

# Who Are We?

The first of its kind, PPHN offers payors a single contract, competitive physician fee schedules, and preferred hospital pricing, resulting in a cost competitive health insurance plan available in 16 counties across the commonwealth. Through our cooperative arrangement, PPHN is able to offer this comprehensive network encompassing three local hospital owned networks.

# Advantages

**P**ennsylvania's Preferred Health Networks brings employers an expansive, credentialed provider network that is easy to access and use. Multi-site employers prefer offering their employees access to a single, large network rather than a patchwork of smaller networks with multiple contracts, logos and varying policies.

PPHN focuses on specific geographic regions providing local customer service, while offering access to enrollees. Each physician has been credentialed by their local network and must comply with strict criteria before they are accepted as participating providers. As an integral part of each community, our network providers are fully committed to assuring high quality, efficient use of healthcare resources to keep our communities healthy and economically viable.

# Medical Management

**P**ennsylvania's Preferred Health Networks provides a full array of utilization and medical management services to assure optimal healthcare resource use. These services are provided by certified Utilization Management (UM) organizations using NCQA and URAC compliant processes. As integral parts of each community, our network providers are fully committed to assuring high quality and efficient use of healthcare resources to keep our communities healthy and economically viable.
